PROFESSIONAL OBJECTIVE

Final-year Software Engineering student seeking a **6-month end-of-studies internship** to apply my skills within a team that values quality and technical impact.

EDUCATION

Engineering Degree in Computer Science

2021 - 2026

ESPRIT - Higher School of Engineering and Technology

- Specialization: **Software Architecture Engineering**

TECHNICAL SKILLS

Languages	Java, TypeScript, Python, C, C++
Frameworks	Spring Boot, Angular, React, Symfony, JPA/Hibernate
Databases	MySQL
Tools & Version Control	Git/GitHub, Maven, Postman, IntelliJ IDEA
Cloud & DevOps	Docker, Kubernetes, AWS Cloud Foundations, CI/CD (Jenkins/GitLab), Grafana, Prometheus
Architecture & Methodologies	REST API, Microservices, Design Patterns (MVC, Repository), Layered Architecture, UML, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer Intern – Backend Development

Jul – Sep 2025

Société Informatique du Centre (S.I.C.)

- Designed and developed a **Spring Boot/JPA/MySQL** backend modernizing public tender management and eliminating redundant Excel workflows, reducing processing time by **70%**.
- Built a robust **REST API** architecture leveraging JPA inheritance to implement business polymorphism (distinguishing Corporate/Individual clients) and orchestrate complex multi-supplier logic.
- Automated the complete document chain through dynamic and standardized generation of **purchase orders, delivery notes, quotes, and invoices** in PDF format with real-time automated calculation of profit margins, VAT, and taxes, reducing manual errors.
- Implemented a multi-layer architecture (**Controller/Service/Repository**) ensuring separation of concerns, code maintainability, and facilitating future system evolution.
- Applied **DevOps and Agile** practices: Git versioning, systematic endpoint validation via Postman, **Docker** containerization, and cloud deployment (Railway) integrated into a **CI/CD** pipeline.

Technical Intern

Jul 2022

Société Informatique du Centre (S.I.C.)

- Technical support, customer assistance, and network solution configuration.

ACADEMIC PROJECTS

Coding Factory – E-Learning Platform

2024 – 2025

Integrated Project – ESPRIT

- Developed the **courses & quizzes** module (Spring Boot + Angular).
- Implemented an **anti-cheating system** (tab detection) and automatic PDF certificate generation.
- Integrated Google Calendar and automated email notifications.

Professional Website – Law Firm

2025

Personal Project

- Built a **React/TypeScript** application with Web3Forms (contact) and Cal.com (appointment booking).
- SEO optimization and automated CI/CD pipeline via Vercel.

CERTIFICATIONS & LANGUAGES

- **Certifications:** AWS Academy Cloud Foundations (Nov 2025), Hashgraph Developer (Nov 2025)
- **Languages:** Arabic (Native), English (C1), French (B2)
